Work Experience

Three Trees Technical - EPorter

Nov 2021 – Jun 2022

Full Stack Developer

Full time

- Worked with a small team to develop a complete package delivery system for a startup.
 - * Web App and Mobile App: Various pages, Forms, Photo/file uploading, and Map Routing
 - * Back-end: Data structure, REST functions for Payment processor (Peloton), Deliveries, and Users
 - * Hosting (Digital Ocean): Image/file upload server, Web Client, and landing page
- MongoDB, Angular 12, TypeScript, NodeJS, Ionic Framework (IOS & Android), Digital Ocean, and Docker.

Metl Solutions

May 2021 - Aug 2021

Backend Developer

Co-op

- Worked with a group of Capstone students to implement a MS Teams bot that interacts with their API.
- Primarily worked on chat event handling and bot backend. Modified API REST functions to support the bot.
- Assisted with documentation and presentations.
- Worked with NodeJS, Python, and Django.

Education

Camosun College

Sept 2019 - Aug 2021

Information and Computer systems

Diploma

- Learned concrete skills on how to:
 - * program, deploy, secure, and maintain software applications to meet requirements.
 - * design, analyze, maintain, and interpret data.
 - * effectively communicate and collaborate with colleagues, team members, employers, and technical and non-technical personnel.
- Hands-on work in web and mobile programming, database design and management, software design, and operations and maintenance of networks and software.

Projects

React Typing Test

github.com/Ethan-Haque/typing-test-react

- Typing test made in React with Tailwind CSS.
 - * Time, words per minute and accuracy are tracked and displayed.
 - * Settings for timer and number of sentences stored in local storage. Accessible with both keyboard and mouse.
- Built with React and Tailwind CSS.

Numpad Calculator

github.com/Ethan-Haque/duckboard-apps

- Reprogrammed custom numpad to have onboard calculator functionality.
 - * OLED display shows current equation/answer.
 - * Answer is saved in onboard memory and can be outputted through the print_ans key.
- Keymap written in C. Compiled and flashed using QMK terminal.

Skills

Languages HTML, JavaScript, C++, C#, SQL, Java, Python, PHP

Frameworks and Tools NodeJS, Angular, React, Git, Docker, MongoDB, Django, AWS (DynamoDB, EC2, S3)
